

SEBASTIAN SOLEDAD

FullStack Engineer

Cúcuta, Colombia | <https://github.com/SebasSoledad07> | soledadsebastian07@gmail.com | [linkedin.com/in/sebastiansoledad](https://www.linkedin.com/in/sebastiansoledad) |

Systems Engineering student and FullStack Developer. I have demonstrated proficiency in Hexagonal Architecture with a strong ability to decouple business logic from infrastructure to ensure software maintainability and scalability.

TECHNICAL SKILLS

- Frontend: Angular, React, TypeScript, JavaScript, HTML, CSS
- Backend: Java, Spring Boot, REST APIs
- Database: PostgreSQL, MySQL, Supabase
- DevOps & Tools: Docker, Render, Git, GitHub

KEY ACHIEVEMENTS

- Development and deployment of full-stack applications in real-world environments.
- Hands-on experience with Docker and cloud deployment.
- Implementation of REST APIs and modern single-page applications (SPAs).
- Independent development of end-to-end technology projects.

PROJECTS

Booking system for Nail Technicians (SaaS)

FullStack Developer (Java Spring Boot, Spring Security, PostgreSQL, Angular 21)

Feb 2026 - Present

- Designed and developed a web application for managing appointments and clients.
- Implemented a REST API using Spring Boot following a layered architecture.
- Built dynamic user interfaces using Angular for booking management.
- Implemented public access via dynamic slugs to allow bookings without authentication.
- Containerized the backend using Docker.
- Deployed the backend to the cloud using Render.
- Integrated PostgreSQL database for persistent data management.

Real Estate Rental Platform (In Development)

FullStack Developer (React, Spring Boot)

2025 - Present

- Developing a web application for listing and renting apartments and houses.
- Implemented initial backend structure using Spring Boot and REST APIs.
- Built frontend components in React for property visualization.
- Designed the system with a scalable approach for future features such as filtering and booking.
- Project currently under active development.

University Course Platform

Frontend Developer (React, Supabase)

Nov 2025 - Dic 2025

- Developed a web platform for managing and accessing university courses.
- Built interactive user interfaces using React.
- Implemented basic user roles (student/professor) to differentiate functionalities.

- Integrated Supabase for authentication, database management, and data storage.
- Structured the application as a Single Page Application (SPA).

EDUCATION

Bachelor of Systems Engineering

February 2021- Present

Francisco de Paula Santander University
